EDUCATION

- **Centurion University of Technology and Management, Vizianagaram, Andhra Pradesh** 2021-2025
B. Tech in Computer Science and Engineering with Computer Networking specialization 9.0 CGPA
- **Sri Chaitanya Junior College, Hyderabad** 2019-2021
Secondary Education, Telangana State Board of Intermediate Education 97.8%

WORK EXPERIENCE

- **Software Engineer Trainee** [Silicon Techlab Pvt Ltd] Jan 2025- Present
 - Developed a fully functional User Management Web Application including ROLE-based authentication and Token-based Authentication

PROJECTS

- **Get Android Application** [Java, Python, Chaquopy] Dec 2024-Present
 - Developed an open-source Android application that integrates the powerful YT-DLP Python library, enabling users to download both video and audio content from a variety of online platforms with ease.
 - Seamlessly incorporated Python functionality into the Android app, allowing the application to handle video downloads efficiently.
 - The project is currently under active development, with ongoing improvements and feature enhancements to expand its capabilities and support additional download options, ensuring continuous updates for users.
 - [Source Code](#)
- **Language Translator** [Java] Jan- Mar 2024
 - Developed an open-source Android application designed to translate both text and audio between multiple languages, offering users a versatile language translation tool.
 - Integrated machine learning models to facilitate seamless, real-time translation, ensuring quick and accurate results for both written and spoken content.
 - Focused on optimizing the user experience by providing an intuitive interface that allows smooth interactions, while leveraging advanced translation technologies for high-quality output.
 - [Source Code](#)
- **Trade Mind** [Java, Springboot, React.js, Java Script] Oct-Dec 2024
 - Developed a Crypto-trading Application using the Spring Framework, integrating CoinGecko API to fetch real-time data for over 5,000 cryptocurrencies, enabling users to track and trade seamlessly.
 - Designed and implemented RESTful APIs to handle over 100 concurrent users, processing transactions, managing portfolios, and updating prices with sub-second response rates.
 - Integrated secure user authentication using Spring Security and JWT, ensuring secure login and trading operations for over 1,000 active users
 - [Source Code](#)
- **Chords Music Player** [Java, Springboot, React.js, Java Script] Oct-Dec 2024
 - Developed a full-stack music player application using Spring Boot for the backend and React for the frontend, enabling users to stream music online without ads. Implemented RESTful APIs for seamless communication between the client and server.
 - Actively maintained the project on GitHub, encouraging community contributions and collaboration, which resulted in a growing user base and valuable feedback for continuous improvement of the application
 - Designed and implemented user-friendly features such as playlist management, search functionality, and real-time streaming, enhancing the overall user experience and engagement with the application.
 - [Go to website](#)

- **LMS Web Application** [*JavaScript, HTML, CSS, SQL Server,PHP*] *Mar 2024*
 - Developed a full-stack LMS application using PHP for the backend and HTML,CSS for the frontend. Implemented RESTful APIs for seamless communication between the client and server.
 - Constructed and optimized both front-end and back-end code using modern technologies, resulting in a 50in database query response times and a 40% reduction in server downtime.
 - Improvements were achieved through optimized back-end PHP scripts, efficient database queries, and front-end JavaScript enhancements, ensuring efficient processing, reduced latency, and streamlined user interface interactions.
 - [Source Code](#)
- **Data Replication and Transportation Tool** [*Python, SQL Server*] *Sept-Dec 2023*
 - Developed an advanced Python data transportation tool, facilitating rapid data transfer across varied platforms, resulting in a 40% reduction in data integration time.
 - Leveraged Python capabilities to enhance transportation efficiency and accuracy, reducing transportation time by 40% and ensuring seamless data transfer.
 - Implemented new features and addressed user feedback to improve the overall user experience, resulting in increased user adoption and satisfaction with the tool.
 - [Source Code](#)

EXTRA-CURRICULAR ACHIEVEMENTS/ACTIVITIES

- Completed 200+ problems in platforms like LeetCode, Geek For Geeks, CodeTantra, Hackerrank, Codeforces and secured a place in top 100 in coding contests.
- Coordinated and executed a large-scale fest, ensuring seamless operation and a successful event. Managed logistics, including scheduling, resource allocation, and team coordination.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, PHP
- **Tools:** Jupyter Notebook, VS Code, GitHub, Docker,Postman, Tomcat, Hibernate ORM, Maven
- **Web Development Frameworks:** Spring Boot, React Js
- **UI Frameworks / Technologies:** HTML, CSS, JQuery
- **Databases:** PostgreSQL, MySQL, Oracle SQL
- **Skills:** Strong analytical and problem-solving abilities, strong understanding of Data Structures & Algorithms, excellent verbal and written communication skills, self-starter, team player with high sense of ownership
